

Electrical Part for Forklifts

Forklift Electrical Part - Forklifts can be particularly marked to be utilized in hazardous places. A marked lift truck indicates the design has met the least requirements of ANSI/UL 558 meant for engine powered lift trucks or ANSI/UL 583 meant for electric forklifts for the type of label attached.

The use for labels used for lift trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Type Designations, Areas of Use, and Maintenance and Operation. Ask your local insurance provider and Fire Marshall for further information on the approved uses of industrial powered lift trucks in your application.

If the specific lift truck meets the outlined standards, labels can be attached. A labeled forklift will show the type of designation placed on the nameplate and will have a properly corresponding label placed.
